

Stellarcleenz

The New Anti-Bacterial Versatile Cloth *that replaces messy, alcohol based gels and wipes*

**99.99%
Pure Silver**

Naturally and safely kills 99% of germs, fungi and viruses

Everyday Germ Protection

ATM Buttons
3,500 germs/sq.in

Keyboards/Mouse
79,000 germs/sq.in

Cell Phones
25,000 germs/sq.in

Condiment Bottles
3,500 germs/sq.in

Gym Handles
18,000 germs/sq.in

Escalator Handles
120,000 germs/sq.in

ECO FRIENDLY

The Perfect Travel Companion!

Dollar Bills
3,000 germs/sq.in

Public Sinks
229,000 germs/sq.in

Porta-Loo
400,000 germs/sq.in

Drinking Fountains
229,000 germs/sq.in

Hands
30,000 germs/sq.in

Carry-On Luggage
15,000 germs/sq.in

Protect Little Ones Too!

Gaming Remotes
18,000 germs/sq.in

Playground Slide
50,000 germs/sq.in

Car Seats
40,000 germs/sq.in

Available in Two Choices

One 25cm Square Silver Cloth with Pouch
Three 12cm Squares with Pouch

- Silver is scientifically documented to inhibit bacteria, fungi and viruses
- Safe and FREE of alcohol, chemicals and toxins - Won't dry and crack skin
- Use dry, wet or damp - Simply wipe hands, skin, surfaces or devices.
- Long lasting, lab tested for over 10,000 wipes + 500 washes
- Economical; less than popular alcohol based gels, sprays and sanitizers
- Light and discreet to carry and use anywhere with no bottles and packs left to dispose of.

**NO LONGER
NEEDED!!!**

Light and discreet to use everywhere - home, office, dining, car, travel, shopping, kids, the gym and much more!

FAQs About Stellarcleenz™

How do I know Stellarcleenz™ are effective?

Silver has been scientifically proven and documented to kill 99% of bacteria, fungi and viruses. *Stellarcleenz™* are made of 99.99% pure silver and have been laboratory tested on human skin, as well as on surfaces and on electronic devices in scientifically protocolled studies conducted at the University of Arizona between March 2015 and May 2016.

Are Stellarcleenz™ safe?

Yes. *Stellarcleenz™* contain 99.99% silver, a precious metal with a long and well-documented history (over 6 millennia) of safe use as a sanitizer and an antimicrobial agent.

Do Stellarcleenz™ contain any chemicals?

No. The silver is a 100% natural element and is chemical-free; it does not cause toxins nor have any reported side effects.

Is there any alcohol in Stellarcleenz™?

None whatsoever. Most anti-microbial products on the market contain 62% or higher levels of alcohol or ethanol which is a man-made chemical. These can be dangerous if ingested, harmful if gets into eyes and can dry out skin, often leaving it susceptible to cracks in the flesh and vulnerable to infection. Frequent use of alcohol-based products has also been reported to build up resistance to anti-microbial combat.

How are Stellarcleenz™ made?

Silver is a naturally occurring element and there are no added or artificial chemicals. *Stellarcleenz™* cloths are made using an ionic technology (not nanotechnology/Nano particles) in a bath process where 99.9% pure silver is plated to very thin nylon. The silver will not wash out. *Stellarcleenz™* have been lab tested for over 10,000 wipes and more than 500 washes without reduction of the silver's anti-microbial effects.

How long will my Stellarcleenz™ last?

A quantitative period is hard to say as one's use can vary. *Stellarcleenz™* have been laboratory tested for thousands of wipes and many washings (see above) with their efficacy remaining at 100%.

Do I need to wash my Stellarcleenz™?

No, not to be effective as an anti-microbial cloth; silver's germ-busting potency works even when soiled. If your cloth gets visibly soiled, or if you desire to wash them for personal reasons, just use mild detergent (no bleach or water softeners) and air dry; they dry very quickly. *Stellarcleenz™* have been laboratory tested for over 500+ washes with efficacy remaining at 100%.

Can I put them in the washing machine and dryer?

Yes, just wash with mild/gentle soap with no bleach or softening agents. It's also very easy to apply just a dab of gentle soap on the cloth, rub it a few times under a faucet, rinse and ring out the moisture. *Stellarcleenz™* can be put in the dryer on a low heat, however it air dries so quickly that this is unnecessary (but it will not get harmed if tossed in a dryer load).

I use an alcohol-based hand sanitizer. Why should I use Stellarcleenz™ instead?

Alcohol-based popular hand sanitizers contain a minimum of 62% alcohol or ethanol which is a man-made chemical. Many have moisturizing filler, but are still drying and can result in cracked skin. Documented reports have also shown this alcohol can be harmful if ingested and/or gets in eyes. Alcohol-based products destroy germs, however, they also are reported to compromise beneficial "good" bacteria that lie underneath the oily layer of the skin, which bodies need.

Stellarcleenz™ are topical and do not disrupt the "good bacteria" populations that work in harmony with our bodies. Additionally, alcohol-based

hand sanitizers often contain ingredients such as synthetic fragrance, propylene glycol, and some, triclosan – a carcinogen, now being banned in many states. Some of these additives are linked to hormonal disruption as well as other potential side effects and can have environmental impact.

Are products listing "organic" or "natural" alcohol safer?

No. The word organic, as well as natural, can often be misleading language used by marketers. Alcohol is alcohol, all is organic in nature. A bottle of 62% alcohol can equal a 120 proof drink. Many do not want to introduce alcohol into their bodies, especially babies and children as well as many under treatments who need to stay toxin and alcohol free.

Does Stellarcleenz™ use nanotechnology?

No, *Stellarcleenz™* technology does not use nanotechnology which is plated and cheaper. Documented research on rodents has indicated that silver nanoparticles can be harmful to humans, in addition to polluting the environment as particles from Nano plating can fleck off and get into waters.

How do Stellarcleenz™ compare to other products that state they are made of 99.99% pure silver?

Stellarcleenz™ are unique and 99.99% pure silver in their entirety, made with some of the finest silver in the world. Many products state they are made of 99.99% pure silver but this can be deceiving and they are not similar or efficacious in killing germs, fungi or viruses as are pure silver cloths. Labeling requirements merely call for nominal amounts of silver/silver fiber (est.12%) to be used to justify use of this statement.

Will Stellarcleenz™ clean dirt off my hands?

Stellarcleenz™ are neither soap nor detergent. They do not eliminate dirt the way soap will do. However, they will rid skin or surfaces of bacteria that may be sitting on one's skin or soiled and dirty surfaces.

How do I know Stellarcleenz™ are working?

Any and all anti-microbial killers are not visible to the eye as bacteria are infinitesimal. People often associate the scent of alcohol with cleanliness and our olfactory systems are conditioned to make this association (think the smell of fresh cookies from the bakery and in malls). *Stellarcleenz™* leave no scent behind, yet silver is a known anti-microbial agent with properties extensively documented in scientific literature. It is a published fact that silver immediately disrupts bacteria, fungi and viruses on contact and causes it to disintegrate. (Scientific literature references are available on www.stellarcleenz.com)

Does clothing now on the market that contains silver and promotes inhibition of odor have the identical anti-microbial benefits of Stellarcleenz™?

No. Many of the apparel products have been laboratory tested and although they inhibit odor-causing bacteria, they only contain limited strands of silver threads and do not have the same anti-microbial efficacy of *Stellarcleenz™*.

What is the cost benefit of using Stellarcleenz™ versus inexpensive gels, sprays or disinfectant sanitizers on the market?

Stellarcleenz™ have been tested for over 10,000 wipes and counting. Big, economy size bottles of gel would cost \$135 and that is only using one squirt; smaller, convenient size bottles would cost over \$250 for as many uses. The benefits to fostering good health are also priceless.
